Note: We have highlighted the fact that **20,761 of the 42,086 (49.2%) outcomes were still unknown.**

Of the **42,086 people that suffered adverse reactions**, this data shows that **1,223 individuals DIED**. **11,361 individuals** had 'not recovered' and **9,400 individuals** conditions were still 'unknown'. **The number of individuals who died must be higher.**

At the very least, **2.9% of the people who suffered adverse reactions, DIED.**

Usually, if a new medicine causes the death of around 50 people, the product is pulled from the market.
